3doors

What makes NEW CR + CRFV ideal for you?

We offer a wide range of models for displaying beverages, dairy products, meat, frozen food, and ice cream. Available in three different lengths (1D, 2D, 3D), giving endless possible configurations.

Powerful & sustainable

Energy saving

EMD - For even lower energy consumption, the smart fridge realizes that its doors have been open for more than 3 hours and turn off the lights by itself, and the cooling goes into energy-saving mode. Everything returns to the basic settings when someone opens the door

Compressors: 20% lower consumption, IQ
Fan motors: 35% lower consumption, LED
lighting: 50% less consumption,

High-quality cooling technology

The refrigeration system is a jewel of high-tech and sustainability: hi-efficiency hermetic compressors, electronic fan motors, and maintenance-free condensers for optimal cooling performance, an automatic defrosting system for perfect display, and a digital controller for quick setup with minimal temperature differentiations in the cabinet.

Sustainability

Ecological refrigerants and parts, such as natural refrigerant R290 (hydrocarbon) and insulation CFC-HCFC free, protect the environment by reducing maintenance intervals. Electronically controlled fans and compressors reduce energy consumption and help ensure a constant product temperature.

CR + CRFV

Plug-in Upright
coolers & freezers

- 01** Large facing, high capacity
Designed to maximize display space,
allowing for the best presentation of
goods.

- 02** Black line
Black exterior and interior colors
follow the latest trends.

- 03** Plug in ready
CR/CRFV cabinets allow for quick
and easy installation through their
plug-in technology.

Basic Equipment

- 01** Hi efficiency compressors
- 02** EBD Electronic fan motors
- 03** Digital controller – thermometer
- 04** EMD – Saving energy mode "CR models"
- 05** Automatic defrost system
- 06** Adjustable shelves
- 07** Price tags
- 08** Internal LED lights
- 09** Antidazzle glass doors
- 10** Regulators
- 11** Castors
- 12** Self-closing doors
- 13** Easily removable metal grid
- 14** Air-cooled maintenance-free condensers
- 15** Internal body from non toxic pre-painted steel sheet

Optional Equipment

- 01** Branding
Possibility of customization with a huge range of color applications on the door profiles, front grid, and sides
- 02** Remote Controller
The temperature of the device is available on the user's mobile device through the app or email. Additionally, the user has access to the temperature history of the device through this app and can export reports to PDF or CSV (Excel).

Technical features

Specification	CR	CRFV
Installation	plug-in	plug-in
Climate class	CC2/K2	4L1
Energy Efficiency	D	D
Temperature	+2/+7°C	-14/-24°C
Refrigerant	R290	R290
Refrigeration	Ventilated	Ventilated
Compressor	Hi efficiency	Hi efficiency
Defrost	Auto	Auto
Opening system	Self closing doors	Self closing doors
Lighting	LED	LED
Length	1d 2d 3d	1d 2d 3d
Depth	77 (cm)	77 (cm)
Height	206 (cm)	206(cm)
